

Enviance Helps Port Authority of New York and New Jersey to Manage and Reduce Environmental Risk

Port Authority Using Enviance Environmental ERP to Implement a Centralized Regulatory Compliance Management System for Federal, State and Local Programs

CARLSBAD, Calif.—Aug 2, 2011—[Enviance, Inc.](#), a global provider of Environmental ERP solutions that measure, manage, report and reduce environmental and regulatory risks, announced today that the Port Authority of New York and New Jersey (“Port Authority”) is using the Enviance platform to facilitate and enhance the management of regulatory compliance across multiple compliance areas (tanks, hazardous waste, emissions, etc.) and all relevant compliance processes. The Port Authority is transitioning to Enviance’s secure cloud-based Regulatory Compliance Management System.

The Port Authority is responsible for integrated regional transportation and trade services operations including—but not limited to—major regional airports, interstate traffic of bridges and tunnels, bus terminals and stations, the PATH rapid transit system and the Hoboken-lower Manhattan ferry service.

The ability of the Enviance System to assist facility staff in fulfilling their compliance management responsibilities, allow corporate staff to have a centralized monitoring capability, and permit the engineering staff to provide technical oversight and support functions (while promoting customized compliance workflow models by the user for managing permit-required processes and assets) was critical for the Port Authority.

“We are excited to be working with the Port Authority of New York and New Jersey to help centralize its vast compliance requirements into one manageable system,” said Lawrence Goldenhersh, president and CEO of Enviance. “The Port Authority’s transition to an Environmental ERP system shows its understanding of compliance requirements and the action needed to reduce environmental risk.”

About Enviance

Enviance is the leading provider of Environmental ERP software, with more than 17,000 users in 49 countries. Our comprehensive solutions have been developed, tested and proven by serving the world’s leading corporations and government organizations for over a decade. As the world business community faces increasing sustainability challenges, Enviance Environmental ERP solutions enable organizations to measure, manage and report environmental performance and compliance needs. The Enviance system leverages cloud computing technology to deliver its Environmental ERP platform online in real-time—

anytime, anywhere and enterprise-wide. Founded in 1999, privately held Enviance is based in Carlsbad, California. For additional information, visit <http://www.enviance.com>
